BAQDAULET YERNAZARULY

AI Systems Engineer & Computer Science Lecturer

Kazakhstan | thebagagroup@gmail.com | +7 747 332 2842

PROFESSIONAL SUMMARY

Systems Engineer and University Lecturer with 5+ years of experience spanning scalable software architecture, mobile/web development, machine learning systems, and tech entrepreneurship. Proven expertise in full-stack development, backend reliability, and mentoring software engineering students. Seeking PhD research and engineering positions focused on **AI-driven adaptive systems, computational media, and scalable intelligent infrastructure(**linkedin.com/in/bgernazar**)**.

TECHNICAL SKILLS & CORE COMPETENCIES

- **Programming Languages:** Java, JavaScript, Node.js, Swift, Python(https://github.com/Bagagroup)
- **Backend & Web Engineering:** Node.js, RESTful APIs, Microservices, Scalable Backend Systems, Database Optimization
- **Mobile Development:** Swift (iOS Development)
- **AI/ML & Systems:** Applied Machine Learning, Algorithmic Optimization, Data Pipelines, System Reliability
- **Pedagogy & Leadership:** Computer Science Education, Tech Entrepreneurship Mentorship, Team Leadership

ACADEMIC & TEACHING EXPERIENCE

Computer Science & Algorithms Lecturer

Suleyman Demirel University (SDU) (2019 – Present) | *Narxoz University* (2024 – Present)

- Teach core undergraduate courses in **Algorithms, Data Structures, and Software Development** (Java, JavaScript).
- Guide students through full-stack and mobile application engineering concepts using **Node.js** and **Swift**.
- Mentor student startups and project teams in IT entrepreneurship, guiding system architecture and product development.

- Design curriculum focusing on algorithmic optimization, computational logic, and clean code principles.

ENGINEERING & INDUSTRY EXPERIENCE

Lead Systems & Software Engineer

Independent Consultant / Self-Employed (2015 – Present)

- Architected end-to-end software applications, leveraging **Node.js** and **Java** backends alongside interactive frontends and iOS native modules (**Swift**).
- Built data-driven backend systems focused on scalability, performance monitoring, and high reliability.
- Advised technology startups on stack selection, API design, data processing workflows, and system optimization.

Telecommunications Engineer

VOLS Project Stroi LTD (2010 – 2012)

- Performed signal testing, fault diagnosis, and maintenance on high-capacity fiber-optic communication networks.

EDUCATION

M.S. in Computer Software Engineering

International IT University (IITU) | 2013 – 2015

- *Focus:* Advanced Software Engineering, Distributed Systems, Algorithmic Optimization.

B.S. in Radio Engineering

Kazakh Academy of Transport and Communication | 2010 – 2013
